Summary

3D Artist with a focus on technical quality and optimization. My academic background in Computer Science allows me to bridge the gap between artistic vision and the technical requirements of game engines. I specialize in creating game-ready assets following a full industry pipeline. Proficiency in programming (Python, JS) enables me to better understand development logic and collaborate effectively with technical teams.

Technical Pipeline

Draft & Blockout	Creating base shapes and silhouettes of objects.
Hi-poly / Sculpt	High-detail modeling and organic sculpting.
Retopology & UV	Creating optimized topology and efficient UV layouts.
Baking & Texture	Map baking (Marmoset) and PBR material creation (Substance).

Skills

Tools & Software	Development	Soft Skills	GameDev Interests
Blender, Marmoset Toolbag, Adobe Substance, Unity VS Code	Python, JavaScript, Node.js	Teamwork, Responsibility, Problem Solving, Adaptability	Horror, Visual Novels, Environment Design, Story- driven Games

Employment history

Dates	Role & company	Key achievements
2025 – 2026	3D Artist (Freelance)	- Game Asset Development - Designed and executed the full development cycle of a jewelry 3D model: from initial sculpting to final rendering.
20.08.2024 – 06.01.2025	Night Administrator Constellation 91	Coordinated internal processes, managed documentation, and ensured operational stability during night shifts.

Education

	Technical College of NULP Associate Degree in Computer Science 2021 — 2024
	Lviv Polytechnic National University B.S. in Computational Intelligence for Smart Systems 2024 — 2027
	Hillel IT School 3D Environment & Prop Art Professional certification focused on environment art and prop creation for games.

Certifications

- [Hillel IT School](#)

Languages

- English (Upper-Intermediate)
- Ukrain (Native speaker)
